Series

Brisbane 18th Oct | Perth 19th Oct | Adelaide 23rd Oct | Canberra 24th Oct | Melbourne 25th Oct | Sydney 29th Oct

01 / INTRODUCTION

What?

Our cities are expanding and evolving at a rapid pace, coupled with the always tight budgetary issues, and red tape required to effect change, we are often stuck in limbo. Rewiring Cities by Design, and transforming the way they work internally and together with outside partners and citizens, is essential so that we can move forward.

The 2nd Annual Smart Cities Series, in partnership with KPMG, and supported by the Australian Smart Communities Association (ASCA), and the Smart Cities Council ANZ, will

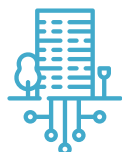

address the challenges faced by our cities and regions, and look to build effective governance frameworks to deal with the changes that we will experience with new operating models and technologies.

Join us and your peers across 6 cities in Australia this October, before culminating at Smart Cities week in Sydney, 29-31 October 2018. The Smart Cities Series, will bring together federal, state, and local government, innovators, thinkers, financiers, educational and research institutions, and technology providers to network and discuss how we can achieve our goals.

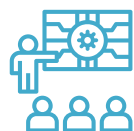

Who?

- Federal and state government policy makers
- City mayors, city councillors, chief executive officers and general managers
- City planners and heads of planning
- Regional and municipal economic development officers
- Senior digital & IT leaders from cities, utilities, energy, health and transport sectors
- Infrastructure and construction experts
- Policy managers and advisors
- Financial institutions and venture capitalists
- Urban planners & consultants

Why?

Learn how to develop Effective City Governance Frameworks to move to a new city operating system

Build Capacity and Capability in your Council to Deliver your Cities Transformation Goals

Gain knowledge of how cities are using urban informatics systems to process all the data to inform better decisions

Engage in an hour long interactive think tank session on a chosen subject

Join the critical discourse and network with your peers to advance your smart cities projects

REEKOH

“ It was a great pleasure to chair the Smart Cities Series 2017. We heard from city mayors and chief executive officers, planners and policy makers, academics, and corporate and community leaders... What we captured was a snapshot of a smart city movement that is focused on citizen needs and ready for change. ”

– Paul Francis, Director, Smart Cities Lead, KPMG Australia
