## WHAT TO EXPECT

Governments face many complex issues: we are constantly challenged to solve society's greatest challenges, serve citizens better, and support the more productive use of public resources. The digital age brings new opportunities to innovate for optimised outcomes.

Finance is in the prime position to navigate change and orchestrate innovation: much of the required data and analytical capability sits in our function and we often have a bird's eye view of the organisation's performance. The challenge, now, is to demonstrate the critical role Finance plays in the digital age to secure our seat at the decision-making table.

The Public Sector Financial Efficiency Conference focuses on how finance leaders in government are transforming the function to sharpen insight and secure its business partner status to drive their organisations towards its long-term goals.

Excellent event, great conversations & a platform to interact with the right government contacts & partner community.

A very relaxed ambience... customers really letting down their guards not feeling as threatened by industry and vendors.

Great event from beginning (planning) to end. One of the best events we have sponsored in terms of conversations had at booth, opportunity to promote our brand. PSN did an amazing job of event management. Well done.

The roadshow was a great way to see what others are up to and provides invaluable networking opportunities to further our learning.
